DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimada et al. (Shimada) (US 6,512,899).

With regard to claims 1 and 5 Shimada discloses an image data output apparatus comprises: a data obtaining section for sequentially obtaining a plurality of image data representative of a plurality of images; a data editing section for performing

a layout processing that images represented by the image data sequentially obtained by said data obtaining section are disposed in order of obtaining of the image data by a number permitted in arrangement as many as possible on a maximum size of sheet of a plurality of predetermined sizes of sheets, and editing image data representative of images disposed by the number permitted in arrangement as many as possible on the maximum size of one sheet onto image data representative of whole images to be recorded on the one sheet; a sheet selection section for selecting from among the plurality of predetermined sizes of sheets a minimum size of sheet capable of recording the automatically whole images represented by image data edited by said data editing section; and a data output section for outputting the image data edited by said data editing section together with data representative of a size of a sheet onto which the hole images represented by the image data are recorded (col 16, line 43 – col 18, line 44).

Allowable Subject Matter

4. Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
